

C-LIFT

LCD-projector ceiling lift

C-Lift
marKant

C-Lift | easy | complete | accurate |

C-Lift | The C-Lift heralds a new generation of ceiling lifts. The unique spindle mechanism guarantees an extraordinarily high degree of repeat adjustment precision. The low lift weighs only 17 kg / 37,4 lbs and assures a fast and easy installation. This ingenious system allows every projector to be easily attached and adjusted to the projection surface. After installation, this compact lift requires less than 28cm / 11" of ceiling space - including a small projector!

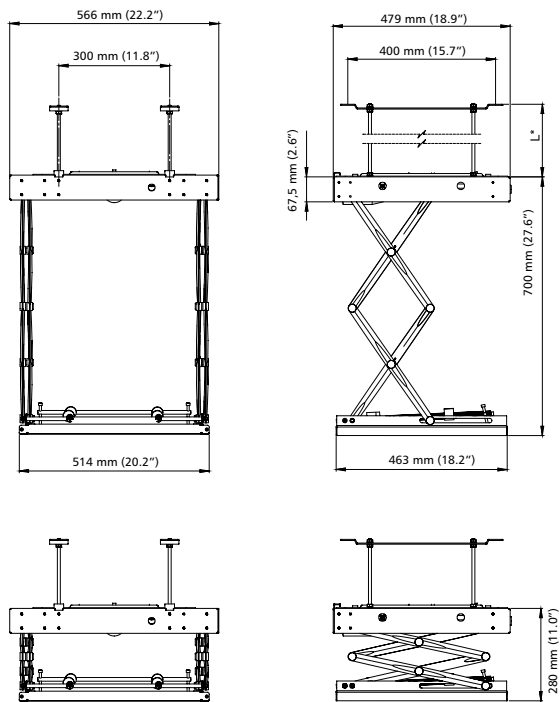

Secure | Security is also an important consideration, due to the susceptibility of projectors to theft, which poses a definite problem in many organizations. The C-Lift offers a perfect solution, because the projector is not visible when not in use: the lift drops it into position only for projection purposes.

Application | Suitable for conference rooms, training centers, boardrooms, presentation rooms and showrooms. It is suitable for use with general-purpose table projectors.
